Why do you wish to serve the county in this capacity? I know that Chatham County is going through rapid change and must make so many environmental decisions and assessments. Perhaps my background has some relevance and can be put to use on this Board. My job with AVX Corporation in Raleigh has been as the environmental manager/engineer. This work has involved air and waste water permit compliance and renewal, hazardous waste management, material recycling programs and waste water treatment systems design. I am not an expert on the CAA or the CWA or Stormwater runoff regulations but have some familiarity with these. This factory will close as it moves its business to China. Hence I have some time to volunteer.

> Also, I am a bird watcher and want to see this county protect its resources and natural heritage for both people and wildlife. The sedimentation of Lake Jordan from recent Cary housing developments makes me very aware that we are not in control of many environmental impacts in this County.
