

- **Feature I** – DWQ intermittent origin @ flag 212 (DWQ I-1); USACE classified feature as a wetland.

The next step in this process is to generate a wetland delineation map for submission to the USACE for approval and permitting. S&EC has not received a draft copy for a sign-off map to date. Please forward a copy of the wetland survey to our office for review. Please note that many DWQ stream determinations were questionable and may be appealed for a more favorable determination. If you would like S&EC to file an appeal, please notify our office within 30-days of receipt of this letter.

Sincerely,

Jason Payne  
Natural Resource Identification Section Leader
