MINUTES
CHATHAM COUNTY BOARD OF COMMISSIONERS
BUDGET INPUT SESSION, JUNE 13, 1997

The Board of Commissioners (the “Board”) of the County of Chatham, North Carolina, met in special session for the purpose of holding a budget workshop in the Bryd’s Administrative Building, Bryd’s Classroom, Pittsboro, North Carolina, at 9:00 A.M. on June 13, 1997.

Present: Chairman Margaret Pollard; Vice Chairman Betty Wilson; Commissioners John Grimes, Uva Holland, and Henry Dunlap; County Manager Charlie Horne; County Attorney, Robert L. Gunn; Assistant County Manager Reneé Dickson; and Clerk to the Board, Sandra B. Lee

The meeting was called to order by the Chairman at 9:05 A.M.

Commissioner Grimes entered the meeting at 9:14 A.M.

Tax Administration

Ken Joyner, Tax Administrator, reviewed costs associated with the mailing of tax bills in letter and card forms. He asked that consideration be given to a computer generated post card bill and stated that graphs can be placed on regular bills but that a break-down of how the tax payers’ tax dollar is spent could not be placed on a post card generated in-house.

Water Rate Information

Jeff Hughes, Public Works Director, reviewed area water rates and stated that Chatham County has the highest water rates of all the utilities surveyed; that most of the utilities surveyed have much larger and more developed systems than Chatham County; and that the larger more urban utilities are able to supply water at a much lower cost. He addressed three areas of concern as follows: 1) Equality - fair rates to users; 2) Actual Costs - rates to cover actual water costs; 3) Affordability - affordable rates; that costs change depending on density; that Chatham County bases apartment billing on the number of units and charges households in apartments the same amount as households living in single family residences; that on average, the monthly bill per household in apartment buildings is 7% less than for households living in single family homes; that the proposed policy change would result in a per household bill for apartment buildings that is 40% lower than the household bill for single family residences; that the Governors Village Apartment project, as designed, should have some positive effects on the utility by providing more customers in a high-density area; that there does not appear to be a purely technical justification for supplying the project water at rates 40% lower than single-family customers; that a policy change of this magnitude would have significant financial and equity implications for the County; and that he recommends modifications such as these be incorporated in an overall study of the County’s water rates.

to facilitate additional investments and partnerships to benefit economic and industrial development; that the County will still be asked to participate in funding utility extensions and other projects eligible through the Business Assistance policy; and that other opportunities such as speculative building partnerships will also be proposed.
